

FAIRNESS Summer School 2024
**Training in micrometeorological
measurements and applications**

ELTE
EÖTVÖS LORÁND
UNIVERSITY

CALL

to the 3rd FAIRNESS Summer School and 7th PannEx Workshop to be held
from 10/06/2024 to 15/06/2024

Location: ELTE Eötvös Loránd University, Budapest, Hungary
in collaboration with HungaroMet, and HUN-REN Centre for Agricultural Research

Topics of the summer school:

The aim of this summer school is to support the participants in their first steps of micrometeorological measurements and data analysis via small group project works. Priority will be given to applicants who have at least general meteorological knowledge and deal with applied micrometeorological issues (urban and/or rural climate, environmental problems, agronomy, forestry, special microclimatological measurements, etc.) requiring field measurements.

The summer school includes hands-on work on the following topics:

- planning the short-term micrometeorological project and measurement program,
- making the measurements, mapping the environment around your station,
- collecting additional measurements, providing datasets (QC/QA, metadata, etc.),
- preparing short paper and presentation for the mini conference at the end of the training school.

The program also includes lectures and an excursion to micrometeorological field sites.

How to apply?

The participation is open for MSc students, PhD students, post-docs and early career scientists from COST member countries and will be reimbursed by the COST action. To apply, you should send your CV, including your basic skills as well as a motivation letter. You can apply by email till **20/04/2024** to the local organiser of the summer school (Dr. Tamás Weidinger: weidi@staff.elte.hu)

A decision on your participation will be made by **06/05/2024**. In case you will be selected by the organisation committee, further information will be provided.

Please, feel free to share the information with your colleagues and students. We welcome the applications.
