Outcome of the conference participation

Description of the outcome of the presentation of the accepted contribution, in terms of grantee's visibility, including the establishment of new contacts for future collaborations

The European Geosciences Union (EGU) General Assembly 2023 brought together geoscientists from all over the world to one meeting covering all disciplines of the Earth, planetary, and space sciences. The EGU provided a forum where scientists, especially early career researchers, can present their work and discuss their ideas with experts in all fields of geoscience. Even though the Conference covers wide range of topics from Geosciences, **specific session related to urban climate “CL2.8 – Urban climate, urban biometeorology, and science tools for cities” gathered prominent researchers from the field and is relevant to the FAIRNESS COST action.** On the conference, I have been a co-convenor of the abovementioned session, thus my visibility and the visibility of the project was high. I have presented a poster and received a number of questions from relevant peers based on UNIs in Germany, Austria, France, Belgium and Netherlands. Thus, there is a potential to connect with these colleagues for future research and project activities.

¹ This report is submitted by the grantee to the Action MC for approval and for claiming payment of the awarded grant. The Grant Awarding Coordinator coordinates the evaluation of this report on behalf of the Action MC and instructs the GH for payment of the Grant.
