Outcome of the conference participation

Description of the outcome of the conference presentation, including contacts made and potential for future collaborations.

(max.500 word)

I presented the poster at DACH, which provided a good opportunity to promote the free-access-book in the meteorological community of Central Europe, mainly the German speaking countries. While the overall interest was limited, I had a nice exchange with the presenter next to me, who was genuinely interested in the poster for this own research, measuring the dispersion of methane fumes. We discussed some related ideas. Another attendee was curious about my general work at the university, which allowed for a short but pleasant conversation. While no direct collaborations have emerged yet, the experience was useful for practicing communication and making a couple of new connections.
